**6. In your opinion, what is the most important aspect to building a college going culture at your school?**

To have staff buy in and have staff participate and encourage college readiness activities. To promote college and career readiness. ;Making assignment more demanding and meaningful.; Parental involvement;Modeling professional behavior, providing professionals to discuss responsibilities of work in the community; Promoting college, offering rigorous classes; Conversations with students about the possibilities. Many are low income and

children of high school drop outs so education isn't a priority for them. ; Rigorous instruction and high expectations.; Educating students of their options and providing them access to college materials and details.

**7. How have your beliefs about what is most important to building a college-going culture at your school changed?**

I have learned that if you don't have buy in throughout the building it's hard to get students to get on board too. ;Importance placed on certification in a profession...not just a 4 year school...; The more poverty, the less parenting, the more students desperately need an education. ; My views have changed within the last 10 years. I believe that post secondary education is important not just sending children to college. Some students are not cut out for college but encouraging learning a trade or skill is equally important.; I now value any additional training after high school as college-going which I didn't originally do. I did only think of a traditional four year college as college going, but after a guest speaker this year, I now know that it is any additional training beyond high school.;

**8. Also, please explain what you see as your role in building a college going culture at your school?**

My role is crucial. I have become more involved w/ the help of gear up, learned more ways to incorporate college-going culture throughout our building, I have learned so much more to do to promote college and career readiness. ;Talking to students about what to expect at college and the different chances they will have there.;Modeling professional behavior, provide financial data for grads vs non-grads, discussion of college experiences and how they were met;  
 I now teach all dual credit classes or mostly upper level classes, so it is a constant subject. ; I am a mentor in my school and since becoming a mentor, I have felt more comfortable supporting students in their college decisions. ;

**14. What do you feel is the most significant factor that prevents students from setting postsecondary goals?**

Their family and cultural environment. ; Lack of self-discipline and self-determination

Establishing small goals to reach bigger goal;

POVERTY; I believe the mindset that our culture gives students affects their confidence about completing college. I believe Gear Up has been providing students with the thought process that they can do it.; Resources

**15. What do you feel is the most significant factor that prevents students from achieving their postsecondary goals?**

The fear of the unknown and leaving their current "comfortable" surroundings. ; Lack of self-discipline and self-determination

Establishing small goals to reach bigger goal;

Lack of self discipline and confidence; Most of our students do not have additional home support that is essential for students to succeed. Most of our students do not have a place to go home to during breaks and can't afford to pay the amount needed to stay in the dorms during that time. We need better support for our students AFTER high school so they have a foundation to stand to actually be successful.; Rigorous Instructions and counseling
